

(SLANTED) SKULL MOUNT INSTRUCTIONS

PRIMOS® HUNTING 604 FIRST ST., FLORA, MS 39071 CUSTOMER SERVICE 601-879-9323

STEP 1 - Insert peg into the hole so that it is flush with the back of the plaque.

STEP 2 - Thread the included wire through the base of the skull.

STEP 3 - Locate the hole at the base of the skull then slide the deer skull onto the peg.

STEP 4 - Thread the wire through the two pilot holes under the peg until there is no slack between the skull and the plaque. Then twist the wire together to secure the deer skull to the plaque.

STEP 5 - Find a stud and mount the plaque to the wall.

(FLAT) SKULL MOUNT INSTRUCTIONS

PRIMOS® HUNTING 604 FIRST ST., FLORA, MS 39071 CUSTOMER SERVICE 601-879-9323

STEP 1 - Thread the included wire through the base of the skull.

STEP 2 - Thread the wire through the two pilot holes under the peg hole until there is no slack between the skull and the plaque. Then twist the wire together to secure the deer skull to the plaque.

(Note: Before beginning this process pay close attention to the teeth on the skull, they are sharp and will scratch the surface fairly easy. To help, place a cloth in between the Plaque and the teeth of your skull. Before completely tightening skull to the Plaque remove the cloth.)

STEP 3 - Find a stud and mount the plaque to the wall.
